HOW THE CELL PHONE SYSTEM WORKS

Your cell phone number will be entered on the receiver at your chosen gate(s). You will receive the specific gate's cell phone number and will store that on your own cell phone under the specific gate's name e.g. "Bruce In" or "Bill Out". **Your cell phone caller ID must be ON.** All you have to do is phone the gate, and once it starts ringing - drop the call. The gate will open with no cost to you! The gate's cell phone number may be known to anybody, but the gate will only open to the cell phone numbers registered on it.
